📁 Project

AI-Powered Yoga Pose Detection

Final Year Project | Python, OpenCV

Built a real-time yoga posture recognition system using machine learning.

Provided posture correction feedback using keypoint detection.

Water Potability Prediction Using Machine Learning

Mini Project | Python

Developed a model to predict drinkable water using supervised learning techniques.

🚩 Papers

Autonomous Vehicle Technology – Phrenic Tyrosine Symposium 2022

Automation in Agriculture – TECH NOVA 2K23, CSE Dept.

Water-Powered Cars – Multidisciplinary Research Conference

Virtual Reality – TECHNOVATE 2K24

🏆 Internship

Web Development – React JS

Shristi Innovative, Technopark Trivandrum | Apr 2024

Built dynamic UI components and implemented routing in React.

Integrated APIs and enhanced responsiveness.

Flutter & Dart – Mobile App Development

Marcello Tech | Jun – Jul 2023

Created cross-platform UI screens and handled app navigation.

NodeMCU IoT Development

Marcello Tech | Jul 2023

Implemented simple IoT-based prototypes using ESP8266 and sensor modules.

Machine Learning – AI Yoga Detection

Ms SquareD Software, Technopark | Mar – Jun 2025

Contributed to training and testing models for yoga pose recognition.

🌟 Certifications

Robotics Program – 2016-2017

Employability Skills Development – Mahindra Pride Classroom (2022–2023)
